

Sharpness – the decisive factor

Saw blades for knee and hip endoprosthesis

Linvatec Hall

Synthes

Stryker

Aesculap

You can always rely on the exceptional sharpness of the EVOLUTION saw blades. The special design of their high-grade tothing guarantees a perfect result and a very long service life. The extraordinary strength of the stainless steel lends the instrument an amazing warp resistance, thus allowing it to realise cuts of outstanding precision. What's more, we supply a suitable saw blade for all commonly used motors and knee systems.

Advantages at a glance:

- for knee and hip endoprosthesis
- for all commonly used power systems
- validated reprocessing method
- long service life
- long-lasting sharpness
